

Steri has the experience needed to ship all of our filters and systems to anywhere in the world. From our largest filter system to our smallest spare part, Steri can get it to you quickly. We ship by air, land, and sea, and are familiar with all of the documentation necessary to satisfy all appropriate agencies.

Oversize Loads

We ship oversize loads via double drop trailers and know the maximum container sizes to avoid oversize load designation. In fact our skidded systems are expressly designed to fit standard over-the-road size requirements.

Heat Treated Wooden Crates

We ship our larger equipment and spare parts in wooden crates designed and built to securely constrain the products. All of the wood we use has been heat treated and is approved for both domestic and world-wide destinations.

Spare part orders (for items in stock) received by 2:30 PM ET can be shipped for delivery on the next business day to destinations anywhere in North America.
